

Ladies and Gentlemen, good morning our time and good evening in Crete!

President Sargetis, I was up very early today to catch the World Council of Cretans conference online. Let me congratulate you on an exceptional presentation on behalf of the Pancretan Association and the Pancretan Endowment Fund. It is very moving to see how well received and highly regarded the PAA is as well. Our representative, Ippokrati Beladakis, is an amazing individual and we are fortunate to have him as the PAA's representative.

Although during the convention there were questions as to why the PAA needed to send financial support to the conference, after seeing the agenda, followed the conference today, and reading the press releases I'm extremely glad, once again, that the PAA is playing a leading role!

I will continue following the conference online at <http://www.ustream.tv/channel/technical-university-of-crete-channel> and strongly suggest to the fellow PAA board members to do the same and spread the word.

The website which includes details regarding the conference is www.cretanscongress.com.

BRAVO!

SA
